Metro Manila, Philippines 1600*

Dear Engr. Alonzo,

Greetings!

This letter is written with great confidence on recommending Mr. Gian Carlo Bigcas for the position of Junior Robotics Engineer at NovaTech Robotics Inc. As his former English Language and Literature teacher, I had the privilege of witnessing Gian Carlo's intellectual depth, disciplined work ethic, and exceptional ability to think critically and logically—qualities that are invaluable in the field of robotics and engineering.

Gian possesses a naturally analytical mind. He approaches problems comprehensively, carefully evaluating the classroom tasks given before presenting well-reasoned outputs. Even in academic settings outside of technical subjects, he demonstrated a scientific way of thinking—breaking down complex ideas into clear, manageable information and communicating them effectively. His capacity to think both critically and creatively allows him to devise innovative approaches to problem-solving, a key asset in robotics development and programming.

In addition, Gian's communication skills, both written and oral, are exemplary. He can articulate technical concepts clearly and concisely, ensuring that his ideas are understood by both technical and non-technical listeners. This ability to bridge analytical thinking with effective communication makes him particularly suited for collaborative engineering environments, where teamwork and clarity are essential.

Beyond his academic excellence, Gian is known for his academic professionalism, curiosity, and sense of responsibility. He consistently seeks opportunities to learn and improve, showing a genuine passion for technology and innovation. His determination and logical mindset make him a promising candidate who will undoubtedly contribute meaningfully to your projects and goals.

In summary, I endorse Mr. Gian Carlo Bigcas for the position of Junior Robotics Engineer. His analytical reasoning, critical thinking, and outstanding communication skills will make him a valuable addition to NovaTech Robotics Inc. Should you need further information regarding his qualifications and character, please feel free to contact me at [markkevin.senal@deped.gov.ph](mailto:markkevin.senal@deped.gov.ph) or 0976 512 0370

Thank you for your time and consideration.

Sincerely,

**MARK KEVIN SEÑAL, MAEd**
